

17th March 2018

GROWING IN YOUR POLYCRUB

A course for anyone interested in growing undercover.

How to plan your growing space; ground preparation and soil management; how to plan the undercover growing year; the all-important aspects of watering, ventilation and temperature control; hints and tips on growing specific vegetable varieties; pest & disease prevention and solutions. The course will also touch on plant propagation, extending the season and overwintering plants.

Fetlar Hall

11.30am-6pm
